Professional Summary

Computer Science and AI/ML undergraduate with hands-on experience in Python, Java, Data Structures and Algorithms, databases, web development, and machine learning. Built applications using Django and Flask with experience in REST APIs, Git, SQL, object-oriented programming, and problem solving. Interested in software engineering and system-level development.

Education

R.V.R. & J.C. College of Engineering, Guntur	2024 – 2027
B.Tech in Artificial Intelligence and Machine Learning	CGPA: 8.74
GIET Polytechnic College, Rajahmundry	2021 – 2024
Diploma in Computer Engineering	89%
S.M.S.S High School, Kovvur	2020 – 2021
SSC	100%

Internship

Python Full Stack Intern – Anurag IT Solutions (Onsite)	Oct 2023 – Apr 2024
- Developed database-driven applications using Python, Django, HTML, CSS, JavaScript, Bootstrap, and MySQL. - Built a Student Information Management System using Python, Tkinter, and SQLite with CRUD operations for 100+ student records. - Implemented data validation, database operations, and application logic using object-oriented programming. - Used Git and GitHub for source-code management and version control.	

Projects

AI Resume Screening and Skill Gap Analysis System	GitHub
<i>Python, Flask, Scikit-learn, NLP, TF-IDF, SQLite</i>	

- Developed an AI-based system to analyze resumes against job descriptions using NLP techniques.
- Implemented PDF extraction, TF-IDF vectorization, and cosine similarity to calculate resume-job matching scores.
- Identified matching and missing skills for automated skill-gap analysis.

E-commerce Web Application	GitHub
-----------------------------------	--------

Django, SQLite, HTML, CSS, Bootstrap

- Built a full-stack e-commerce application with authentication, product management, shopping cart, and order processing.
- Implemented database operations using Django ORM and SQLite.
- Developed product listing, category filtering, and responsive UI.

Wardrobe Management System	GitHub
-----------------------------------	--------

Django, SQLite, HTML, CSS, Bootstrap

- Developed a Django application with authentication, CRUD operations, search, and category-based filtering.
- Used Django ORM and SQLite for structured data storage and retrieval.

Technical Skills

Languages: Python, Java

Data Structures & Algorithms: Arrays, Hash Tables, Binary Search, Sorting, Two Pointers, Linked Lists, Divide and Conquer, Dynamic Programming

CS Concepts: OOP, Algorithms, Problem Solving, DBMS, REST APIs

Web: HTML, CSS, JavaScript, Bootstrap, jQuery

Frameworks: Django, Flask, Tkinter

Databases: MySQL, SQLite

Machine Learning: Scikit-learn, NLP, TF-IDF, Cosine Similarity

Tools: Git, GitHub, VS Code

Certifications

- Data Structures and Algorithms using Java – NPTEL, IIT Kharagpur (Top 5%, 70%, 2025)
- Django Web Development with 5 Real Projects – Udemy (2025)
- Python Django 101 – Simplilearn (2025)

Achievements

- Solved 67+ LeetCode problems covering arrays, hash tables, binary search, sorting, two pointers, divide and conquer, and dynamic programming.
- Selected as a finalist in Smart Idea Challenge 2024 at R.V.R. & J.C. College of Engineering.
- Participated in Rupajna 2025 intra-college prototype challenge.
- Participated in Code Crack Conquest – Data Structures Concepts.
